PROFESSIONAL SUMMARY

Full-Stack Software Developer with production experience building React.js and React Native applications, and hands-on backend experience in Java and Spring Boot — REST API design, authentication, and relational database schema design. Skilled in API integration, debugging, and end-to-end development across web and mobile.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL, Dart

Frontend: React.js, React Native, Flutter, HTML5, CSS3, Expo

Backend: Java, Spring Boot, Spring Security, REST APIs, JWT Authentication

Databases: PostgreSQL, MySQL

Tools & Practices: Git, GitHub, Maven, Postman, Swagger/OpenAPI, CI/CD (GitHub Actions), Agile/Scrum

Core Concepts: Data Structures & Algorithms, OOP, DBMS, SDLC

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern

Jan 2026 – Present

CGPI Software Private Limited

Pune, India

- Built and shipped features across 2 live web and mobile products, contributing across UI development and API integration.
- Developed responsive React.js interfaces and reusable components for desktop, tablet, and mobile, and integrated REST APIs for product catalogs, authentication, and push notifications.
- Collaborated with backend engineers to debug and troubleshoot API and integration issues, contributing to root-cause analysis across the stack.
- Resolved production issues in authentication, navigation, and performance while participating in agile sprints and code reviews.

PROJECTS

EONE – Classroom Management Platform

Academic Project | [\[Code\]](#)

Java, Spring Boot, Spring Security, PostgreSQL, Flutter, JWT

Full-Stack Development

- Designed and built a full-stack classroom management platform with Spring Boot (Java 17) REST APIs and a Flutter cross-platform frontend, supporting Admin, Teacher, and Student roles.
- Developed approximately 78 REST API endpoints across 17 controllers covering user management, classrooms, subjects, assignments, submissions, grading, and notifications.
- Implemented JWT-based authentication and role-based access control using Spring Security, including a custom authentication filter, BCrypt password hashing, and method-level authorization.
- Designed a PostgreSQL schema with 17 core tables modeling classroom hierarchies and assignment/grading workflows; built file upload handling, an admin approval workflow with async email notifications, and documented the API with Postman and Swagger.

KitchenaryKart

Live Production Platform

React.js, JavaScript, REST APIs, CSS3

kitchenarykart.com

- Shipped frontend for a live B2B e-commerce platform serving active hospitality/kitchen-essentials customers, building reusable React components (product cards, filters, search, cart) and integrating REST APIs for catalog, browsing, and search, in collaboration with backend and design teams.

Hotelic Essentials

500+ Installs Across Android & iOS

React Native, Expo, REST APIs

Google Play · App Store

- Redesigned and delivered the complete mobile UI for Android and iOS using React Native and Expo, integrating REST APIs, JWT-based authentication, and push notification workflows for full user onboarding.
- Improved app navigation and responsiveness across device sizes and debugged critical authentication, layout, and performance issues before App Store and Play Store submission.

EDUCATION

Fergusson College, Pune

Aug 2024 – May 2026

M.Sc. Computer Science

CGPA: 8.63 / 10

K.K. Wagh ACS & CS College, Nashik

Jul 2021 – May 2024

B.Sc. Computer Science

CGPA: 7.4 / 10

ACHIEVEMENTS

- Shipped 2 production-grade apps as an intern, and built EONE – a full-stack academic project with ~78 REST API endpoints – independently.
- Participated in AI Model Training Workshop (Fergusson College x Chainworks Digital, 2025) and APGI Hackathon.
